

USB TYPE A/B

Product Description

Connector: USB Type A Male to Type B Male

Transfer rates up to 480 Mbps depending on USB version

USB 1.1

USB 1.1 is a single, standardized, easy-to-use way to connect up to 127 devices to a computer. Because of its relatively slow transfer rate of 12 Mbps, USB is used as a connector of devices that didn't need tremendous bandwidth, like mice, printers, scanners, etc. It combines all advantages of a multiplatform standard (cost efficiency, auto-configuration, increased compatibility, larger number of available peripherals.)

USB 2.0

The high-speed USB 2.0 features a maximum transfer rate that's forty times faster than USB 1.1, 480mbps.
